**DIV. OF OIL, GAS & MINING**

---ooOoo---

**SMALL MINE RECLAMATION CONTRACT**

This Reclamation Contract (hereinafter referred to as "Contract") is entered into between Red Leaf Resources, Inc. the "Operator" and the Utah State Division of Oil, Gas and Mining ("Division").

WHEREAS, Operator desires to conduct mining operations under Notice of Intention (NOI) File No. S/047/0102 which the Operator has filed with the Division and has been determined by the Division to be complete (Complete NOI) as required by the Utah Mined Land Reclamation Act, Sections 40-8-1 et seq., Utah Code Annotated, (2005, as amended) (hereinafter referred to as "Act") and the regulations adopted pursuant to the Act; and

WHEREAS, Operator is obligated to reclaim the lands affected by the mining operations in accordance with the Act and the regulations, and is obligated to provide a surety in a form and amount approved by the Division or the Board of Oil, Gas and Mining (Board) to assure reclamation of the lands affected by the mining operations.

NOW, THEREFORE, the Division and the Operator agree as follows:

1. Operator agrees to promptly reclaim in accordance with the requirements of the Act and applicable regulations, as they may be amended, all of the lands affected by the mining operations conducted or to be conducted pursuant to a Complete Notice of Intention.
2. The Lands Affected by the mining operations and subject to the requirements of the Act and this Contract include:
  - A. All surface and subsurface areas affected or to be affected by the mining operations including but not limited to private on-site ways, roads, railroads; land excavations; drill sites and workings; refuse banks or spoil piles; evaporation or settling

ponds; stockpiles; leaching dumps; placer areas; tailings ponds or dumps; work, parking, storage, and waste discharge areas, structures, and facilities; and

- B. All mining disturbances regardless of discrepancies in the map and legal description, unless explicitly and clearly identified as EXCLUDED on maps, and legal descriptions included in the Complete NOI; provided lands may be excluded only if: (1) they were disturbed by mining operations that ceased prior to July 1, 1977; (2) the lands would be included but have been reclaimed in accordance with a complete notice or reclamation plan; or (3) the lands were disturbed by a prior operation for which there is no surety, no legally responsible entity or person, and which lands are not necessarily or incidentally intended to be affected by the mining operations as described in the Complete NOI.
- 3. The Operator shall be responsible for reclamation of all such Lands Affected regardless of errors or discrepancies in the maps or legal descriptions provided with the NOI which are intended to assist in determining the location of the mining operations, to describe the areas of disturbance, and to assist estimating the amount of surety required.
  - 4. The Operator prior to commencement of any mining operations and as a precondition to the rights under the Notice of Intention shall provide a surety in a form permitted by the Act and in an amount sufficient to assure that reclamation of the Lands Affected will be completed as required by the Act. The Surety shall remain in full force and effect according to its terms unless modified by the Division in writing. A copy of the agreement providing for the Surety for the reclamation obligations herein is included as **ATTACHMENT A** to this Contract.
  - 5. If the Surety expressly provides for cancellation or termination for non-renewal:
    - A. The Operator shall within 60 days following the Division's receipt of notice that the Surety will be terminated or cancelled, provide a replacement Surety sufficient in a form and amount, as required by the Act, to replace the cancelled surety; or
    - B. If the Operator fails to provide an acceptable replacement Surety within 60 days of notice of cancellation or termination, the Division may order the Operator to cease further mining activities, and without further notice proceed to draw upon letters of credit, to withdraw any amounts in certificates of deposit or cash and/or any other forms of surety, and to otherwise take such action as may be necessary to secure the rights of the Division to perfect its claim on the existing surety for the purpose of fully satisfying all of the reclamation

obligations incurred by the Operator prior to the date of termination, and the Division may thereafter require the Operator to begin immediate reclamation of the Lands Affected by the mining operations, and may, if necessary, proceed to take such further actions as may be required for the Division to forfeit the surety for the purpose of reclaiming the Lands Affected.

6. The Operator's liability under this Contract shall continue in full force and effect until the Division finds that the Operator has reclaimed the Lands Affected by mining operations in accordance with the Act and regulations, as amended. If the mining operations are modified or for any other reason vary from those described in the Complete Notice of Intention, the Operator shall immediately advise the Division, and the Notice of Intention shall be revised and the Surety amount shall be adjusted as necessary.
7. If reclamation of a substantial phase or segment of the Lands Affected by the mining operations is completed to the satisfaction of the Division, and the Division finds that such substantial phases or segments are severable from the remainder of the mining area, Operator may request the Division to find that Operator has reclaimed such area. If the Division makes such finding, Operator may make request to the Division for a reduction in the aggregate face amount of the Surety, and the Division may reduce the surety to an amount necessary to complete reclamation of the remaining mining operations as anticipated by the Complete Notice of Intention in accordance with the requirements of the Act and regulations, as amended.
8. Operator may, at any time, submit a request to the Division to substitute surety. The Division may approve such substitution if the substitute surety meets the requirements of the Act and the applicable rules.
9. Operator agrees to pay all legally determined public liability and property damage claims resulting from mining operations, to pay all permit fees, to maintain suitable records, to file all required reports, to permit reasonable inspections, and to fulfill all sundry reporting requirements applicable to the mine as required by the Act and implementing rules.
10. Operator agrees to indemnify and hold harmless the State, Board, and the Division from any claim, demand, liability, cost, charge, suit, or obligation of whatsoever nature arising from the failure of Operator or Operator's agents and employees, or contractors to comply with this Contract.
11. If Operator shall default in the performance of its obligations hereunder, Operator shall be liable for all damages resulting from the breach hereof including all costs, expenses, and reasonable attorney's fees incurred by the Division and/or the Board in the enforcement of this Contract.

12. Any breach of a material provision of this Contract by Operator may, at the discretion of the Division, in addition to other remedies available to it, result in an order by the Division requiring the Operator to cease mining operations, and may thereafter result in an Order, subject to an opportunity for notice and hearing before the Board, withdrawing and revoking the Notice of Intention, and requiring immediate reclamation by the Operator of the Lands Affected or forfeiture of the Surety.
13. In the event of forfeiture of the Surety, Operator shall be liable for any additional costs in excess of the surety amount that is required to comply with this Contract. Upon completion of the reclamation of all of the Lands Affected, any excess monies resulting from forfeiture of the Surety shall be returned to the rightful claimant.
14. The Operator shall notify the Division immediately of any changes in the Operator's registered agent, the Operator's address, form of business, name of business, significant changes in ownership, and other pertinent changes in the information required as part of the Notice of Intention. Notwithstanding this requirement, any changes to the Notice of Intention, and any errors, omissions, or failures to fully or accurately complete or update the information on the Notice of Intention, or the attached maps, shall not affect the validity of this Contract and the rights of the Division to enforce its terms.
15. If requested by the Division, the Operator shall execute addendums to this Contract to add or substitute parties, or to reflect changes in the Operator, Surety, and otherwise modify the Contract to reflect changes in the mining operations as requested by the Division. All modifications must be in writing and signed by the parties, and no verbal agreements, or modifications in any of the terms or conditions shall be enforceable.
16. This Contract shall be governed and construed in accordance with the laws of the State of Utah.

The signatory below represents that the Operator, if not a natural person, is a properly organized entity in good standing under the laws of Utah and the United States, is registered as an entity authorized to do business in the State of Utah, and that he/she is authorized to execute this Contract on behalf of the entity as Operator.

**Notice of Intention to Commence Large Mining Operations**

**Red Leaf Resources, Inc.**

**Southwest #1 Project, Uinta Basin  
Introduction and Project Background**

Red Leaf Resources, Inc. ("RLR" or "Red Leaf") holds oil shale mineral leases on 16,838 acres on School and Institutional Trust Land properties in the Uinta Basin.

RLR has previously performed process testing under its Exploration Permit #E/047/0055. RLR's Exploration permit was converted to a Small Mining Operation (SMO) in January 2011, with final approval for operations on January 27, 2011. Activities associated with this SMO permit were incorporated into this LMO in July 2014, and the SMO permit was terminated. For information purposes, SMO areas are outlined in Appendix X, Small Mining Operation Permit Activity Locations.

RLR filed for an exploration permit, Southwest #2, E/047/0062, on March 24, 2011 for purposes of conducting additional exploration activities. Activities associated with this exploration permit were incorporated into this LMO NOI in April 2014, and the exploration permit was terminated. For information purposes, the disturbed areas under E/047/0062 for Southwest #2 and related holes are outlined in Appendix W, Exploration Permit Activity Locations.

It is now RLR's intention to expand activities at the Southwest #1 small mine site and convert it to a Large Mining Operation (LMO) as identified in this NOI. The disturbed area under E/047/0062 will also be included under the planned Large Mine Operations.

The location of RLR's Southwest #1 project includes acreage held in its SITLA Mineral Leases (ML) 50150 and 43374. The acreage associated with this mine plan from ML 50150 includes

DIV. OIL GAS & MINING

### ***Water Discharge***

There are no plans to have process water discharged from this property.

Storm water discharge will be managed according to the Drainage Control Plan included in **APPENDIX E**. Upland water will either be diverted around the site or stored briefly in small sumps. Water will be actively pumped from the upland sumps for operational use, to maintain adequate storage for a 10-year 24-hour storm event, consistent with good engineering practices for similar structures in this region. The sump embankments will be protected through the use of an emergency spillway sized to handle the 100-year 24-hour storm. Upland diversions will also be sized for the 100-year 24-hour storm with a 0.5-foot freeboard to ensure adequate protection of the mine pit in the event of sediment or debris deposition during a large storm. Reclamation sumps and Ponds 4 and 5 will contain the water within the permit area. Storm water from disturbed areas will be controlled using storm water sumps and other devices to prevent discharges from the site.

### ***Electrical Power Supply***

Initially, Red Leaf will use high efficiency generators to provide power to the project. However, it is anticipated that power from the electrical grid will satisfy long-term power demand for the project. See Appendix K for additional information about anticipated electrical power production and use.

### ***Water Supply and Waste Water***

Red Leaf's initial water use estimates for the project are outlined in Appendix K, Water Management Strategy. Estimates for water will be adjusted and updated as necessary following completion of initial capsule operations, as additional information becomes available.

Water needs will be met with on-site water production associated with operation of the Eco

Shale In-Capsule process and from a supplemental network of water wells with onsite storage to manage spikes in water demand. Design and location of the water strategy facilities is included as part of Red Leaf's water management strategy (See **APPENDIX K--Water Management Strategy**).

Red Leaf has access to water rights sufficient to meet requirements for operations. All points of diversion and withdrawals will be covered by water rights held by Red Leaf and registered with the Utah State Engineer's Office. Currently, Red Leaf has exercised 500 acre feet of water rights and has applied to register these with the State Engineer (49-2330). Red Leaf holds additional water rights options that can be converted to firm water leasing rights as required by operations.

#### 106.3: Estimated Acreage

##### ***Disturbance and Reclamation Summary***

At the onset of mining, soil will be salvaged and stockpiled for later use during reclamation. Some overburden material will need to be stockpiled as well to create adequate space required for capsule construction which occurs on the floor of the pit once ore has been mined. Once capsule construction is underway, the mining and material movement and capsule construction and ore recovery reach a steady-state that continues until the mine nears completion. The table below provides a summary by year of acres disturbed exclusive of reclamation. Year 1 shows the disturbance of more acres than subsequent years because pre-stripping and stockpiling is required. By year 20, pre-stripping on all mine areas has been completed.

## Appendix X

### Small Mining Operation Permit Activity Locations

Table X-1 and Figure X-1, attached to and made part of this appendix, outline locations and activities associated with Red Leaf's former exploration permit, Southwest #1, S/047/0102.

### Division of Oil, Gas and Mining

JOHN R. BAZA  
Division Director

December 27, 2010

James Patten  
Red Leaf Resources, Inc.  
200 West Civic Center Drive, Suite 190  
Sandy, Utah 84070

Subject: Reclamation Surety Required and Reclamation Contract, Red Leaf Resources, Southwest #1, S/047/0102, Uintah County, Utah

Dear Dr. Patten:

The referenced Notice of Intent to Commence Small Mining Operations (NOI), received by the Division December 8, 2010, is complete **with the exception of the reclamation bonding requirement and reclamation contract.** The reclamation surety is determined to be \$150,393.00. The calculation for this amount was included in the NOI, and it includes five acres of disturbance, site equipment and the plugging of the water well on site. This site currently has an exploration permit with a bond of \$42,100.00. The exploration permit will be closed after the new permit is approved.

Please submit the additional reclamation surety and reclamation contract within the next 30 days. No additional mining related disturbance may be created until the surety is received and approved, and you have received written acceptance from this office as well as other applicable agencies.

The reclamation surety may be submitted in one of several forms, including an irrevocable letter of credit, a certificate of deposit, cash, or a surety bond. Please contact Penny Berry at (801) 538-5291 or by e-mail at [bondcoordinator@utah.gov](mailto:bondcoordinator@utah.gov) for assistance in completing this requirement.

Please contact me at 801-538-5261 or Leslie Heppler at 801-538-5257 if you have any questions regarding this letter. In reply please refer to file number S0470102.
